Top Findings

CRITICAL

Delayed refresh under 20 hours must not be used: Fix any of the following: <meta> tag forces timed refresh of page (less than 20 hours)

WCAG 2.2.1

Page: / WCAG 2.2.1

Element:

```
<meta http-equiv="refresh" content="360">
```

SONDE FIX PLAN

Ensure <meta http-equiv="refresh"> is not used for delayed refresh. See: https://www.w3.org/WAI/WCAG22/Understanding/timing-adjustable Remove the auto-refresh. If content needs updating, use JavaScript to update specific page regions without a full refresh, and announce changes via aria-live.

HIGH

Page has no detectable navigation mechanisms (no <nav>, search, sitemap link, breadcrumbs, or table of contents). Users need multiple ways to locate content.

WCAG 2.4.5

Page: / WCAG 2.4.5

SONDE FIX PLAN

Add at least two of: site navigation (<nav>), search functionality (input[type="search"] or role="search"), a sitemap link, breadcrumb navigation, or a table of contents.

HIGH

Missing Strict-Transport-Security header (HSTS)

Page: /

SONDE FIX PLAN

Add Strict-Transport-Security header with max-age of at least 31536000 Add X-Content-Type-Options: nosniff Add X-Frame-Options: DENY or SAMEORIGIN

MEDIUM

Page requires horizontal scrolling at 320px width (71px overflow). Content should reflow without horizontal scrolling at this width.

WCAG 1.4.10

Page: / WCAG 1.4.10

Element:

```
<html>
```

SONDE FIX PLAN

Use responsive CSS (max-width, flex-wrap, media queries) to ensure content reflows at narrow widths.

Methodology

The Sonde Score is a universal 0–1000 compliance index — think of it like a credit score for accessibility. Each finding is weighted by its impact on human access: a keyboard trap (critical) counts far more than a best-practice suggestion (low). The raw penalty is normalized per page so scores are comparable across sites of any size. A harmonic curve ensures every site gets a meaningful score — no zeros, no false perfection.

```
Score = round(1000 × S / (S + P/N))
```

where S = sensitivity (750), P = Σ(weight × count), N = pages scanned

TIER	WEIGHT	EXAMPLES
Critical	10	Keyboard traps, missing page language
High	3	Missing alt text, insufficient contrast
Medium	1	Heading hierarchy, unclear link purpose
Low	0.25	Best-practice suggestions

The Sonde Score is a living standard (v0.1). We're building it in the open because accessibility is too important for closed-door decisions. Your expertise makes it better.

---

This report is a health check, not a verdict. Every website has room to improve.

Disclaimer: This report presents the results of automated accessibility analysis and is provided free of charge, as-is, without warranty of any kind. Findings are generated by software, not by human accessibility experts, and may contain errors or omissions. Automated testing can detect approximately 30–40% of accessibility issues; manual expert evaluation is recommended for complete conformance assessment. Scores reflect algorithmic analysis under a published methodology open to public review—they are not legal determinations of compliance. Results reflect the state of the website at the time of scanning and may change as the site is updated. Nothing in this report constitutes legal advice. Sonde assumes no liability for decisions made based on these results.
