Méthodologie

Le Sonde Score est un indice de conformité universel de 0 à 1000 — considérez-le comme une cote de crédit pour l'accessibilité. Chaque résultat est pondéré par son impact sur l'accès humain : un piège au clavier (critique) compte bien plus qu'une suggestion de meilleure pratique (faible). La pénalité brute est normalisée par page afin que les scores soient comparables entre des sites de toutes tailles. Une courbe harmonique garantit que chaque site obtient un score significatif — pas de zéros, pas de fausse perfection.

```
Score = round(1000 × S / (S + P/N))
```

où S = sensibilité (750), P = Σ(poids × nombre), N = pages scannées

NIVEAU	POIDS	EXEMPLES
Critique	10	Pièges au clavier
Élevé	3	Texte alternatif manquant
Moyen	1	Hiérarchie des titres
Faible	0.25	Meilleures pratiques

Le Sonde Score est une norme vivante (v0.1). Nous la construisons ouvertement car l'accessibilité est trop importante pour des décisions prises à huis clos. Votre expertise la rend meilleure.

Mission Control

Consultez les données brutes des résultats, suivez les changements entre les scans et contribuez à la méthodologie ouverte de Sonde.
