PLAN DE CORRECCIÓN SONDE

Add a non-color visual indicator to links: underline (text-decoration: underline), border-bottom, increased font-weight, or a visible icon. The indicator must be present in the default state, not just on hover.

MEDIUM

Link is distinguished from surrounding text only by color (link: rgb(255, 255, 255), text: rgb(68, 68, 68)). Users who cannot perceive color differences may not identify this as a link.

Metodología

Sonde Score es un índice universal de cumplimiento 0–1000 — piénsalo como una puntuación de crédito para la accesibilidad. Cada hallazgo se pondera por su impacto en el acceso humano: una trampa de teclado (crítico) cuenta mucho más que una sugerencia de buena práctica (bajo). La penalización bruta se normaliza por página para que las puntuaciones sean comparables entre sitios de cualquier tamaño. Una curva armónica garantiza que cada sitio obtenga una puntuación significativa — sin ceros, sin perfecciones falsas.

```
Puntuación = round(1000 × S / (S + P/N))
```

donde S = sensibilidad (750), P = Σ(peso × cantidad), N = páginas escaneadas

NIVEL	PESO	EJEMPLOS
Crítico	10	Trampas de teclado
Alto	3	Texto alternativo faltante
Medio	1	Jerarquía de encabezados
Bajo	0.25	Mejores prácticas

El Sonde Score es un estándar vivo (v0.1). Lo estamos creando en abierto porque la accesibilidad es demasiado importante para que se tomen decisiones a puerta cerrada. Su experiencia lo mejora.

Ingresar a Mission Control

Revise los datos crudos de los hallazgos, rastree los cambios entre los escaneos y contribuya a la metodología abierta de Sonde.
